Microsoft
Source Review Guide

Portfolio project 03. Source package added 12 October 2026. Model cutoff remains 8 October 2026.

How to check a workbook number

Open **source_crosswalk.csv**, find the Excel worksheet and cell, then open the corresponding highlighted filing at the listed **PDF page**. Hover or click the colored annotation to see the source ID, fiscal period, metric, source value and Excel references. The purple or other colored margin stripe identifies a page used by the workbook. PDF bookmarks jump directly to used pages.

The package contains ten complete native Form 10-K PDFs, their annotated copies, and thirteen original-format HTML/JSON snapshots. Originals are in **data/raw/reports/originals**; review copies are in **data/raw/reports/highlighted**. Original pagination and source text are retained.

Color legend

Color	Meaning
Green	Income-statement inputs: revenue, costs, earnings and share counts
Blue	Balance-sheet inputs, including FY2016 opening-cash context
Yellow	Cash-flow inputs and financing/investing components
Purple	Segments, note disclosures and contractual payment schedules

Reported values and model conventions

The fiscal period and filing year can differ. The model uses the latest available comparative presentation at its cutoff. For example, FY2017 revenue is taken from the FY2019 filing, while the FY2017 balance sheet is from FY2018. FY2016 is opening-balance context only, not an eleventh historical year.

Some note figures are disclosed in billions and stored in Excel in millions. Certain contra balances and expenses are shown as negative deductions in the report and stored as positive magnitudes in the schedule. The crosswalk records both values and labels these conversions.

A normalized zero for an omitted line is not an explicit company disclosure. Calculated cash-flow residuals and aggregates are also identified separately. These records point to the relevant source table and are not highlighted as an invented reported number. Forecast assumptions are analyst inputs; no source annotation presents them as reported actuals.

Report index and marked pages

Form 10-K	PDF pages	Used PDF pages	Source records
FY2017	116	51	1
FY2018	129	53, 75, 87	39
FY2019	146	51, 53-54, 72, 76, 82-83, 90	105
FY2020	118	55, 57-58, 75, 77, 83-84, 91	105
FY2021	116	57, 59-60, 77, 80, 86-87, 94	105
FY2022	116	57, 59-60, 77, 80, 86-87, 94	106
FY2023	116	58, 60-61, 78, 80, 86-87, 94	106
FY2024	168	56, 58-59, 76, 79, 85, 92	105
FY2025	158	50, 52-53, 62, 69, 72, 77-78, 84	109
FY2026	124	44, 50, 52-53, 62, 69, 71-73, 77-78, 84	320

PDF page means the one-based page shown by the PDF viewer. It is kept unchanged between each original and its highlighted copy. Some filings include exhibits after the financial statements.

Verification

1,101 source records link workbook inputs to evidence. The copies contain **3,906** value/label highlights across **72** used report pages. Source text and page counts match the originals. Excel and Word deliverables are unchanged.

Evidence convention	Records
calculated aggregate	4
calculated residual	10
normalized absence	58
opening balance context	1
reported	968
reported billion to million	22
reported contractual schedule	21
reported magnitude	17

Download timing and reproducibility

New downloads are dated separately from the original model sources. The initial source_manifest.json and the frozen selected_sec_facts.json remain intact. raw_materials_manifest.json records source URLs, filing accessions, retrieval times and SHA-256 hashes.

The freshly downloaded ar26.html differs in bytes from the initial capture. The frozen extracted statement tables and selected XBRL facts retain the model's source selection; the PDF links were verified against its actual input values.

Examples and source links

Historical Inputs!E9: revenue

FY2017; FY2019 filing; PDF page 51. Source value 96,571.0; workbook value 96,571.0 USD millions. Convention: reported.

Historical Inputs!N9: revenue

FY2026; FY2026 filing; PDF page 50. Source value 331,839.0; workbook value 331,839.0 USD millions. Convention: reported.

Historical Inputs!N80: cfo

FY2026; FY2026 filing; PDF page 53. Source value 182,935.0; workbook value 182,935.0 USD millions. Convention: reported.

Filing Notes!N25: debt discount

FY2026; FY2026 filing; PDF page 72. Source value -1,081; workbook value 1,081 USD millions. Convention: reported magnitude.

Filing Notes!O37: debt maturities

FY2027; FY2026 filing; PDF page 73. Source value 9,250; workbook value 9,250 USD millions. Convention: reported contractual schedule.

Filing Notes!N31: construction commitments

FY2026; FY2026 filing; PDF page 44. Source value 34,566; workbook value 34,566 USD millions. Convention: reported.

Standing requirements for future projects

The shared PROJECT_STANDARDS.md and root AGENTS.md require 24 pt Excel table rows, explanatory charts and expanded analysis, native hover Notes, complete raw materials, separate highlighted PDFs and a source crosswalk for future similar projects.
