Microsoft source evidence guide

Portfolio project 02 | 8 October 2026 cutoff

The full original reports are in **data/raw/reports/originals**. Review copies in **data/raw/reports/highlighted** preserve all pages and the original native text. Colored annotations identify the exact source values and their Excel destinations.

Find an Excel cell in **docs/source_crosswalk.csv** or Source Catalog, then open the marked PDF at its one-based PDF page. Hover or click an annotation for source ID, fiscal year, units, conversion and Excel reference. Bookmarks and margin stripes identify used pages.

Highlight colours

Category	Colour	Examples
Income	Green	Revenue and operating profit
Balance	Blue	Cash, NWC assets and liabilities
Cash flow	Yellow	CFO, cash capex and SBC
Notes and segments	Purple	Leases, depreciation, shares and debt fair value

The crosswalk contains **402** records. All **344** reported records have source annotations. **51** missing prior note disclosures remain n.a. Seven normalized absence records identify omitted lines; they are not highlighted as explicit reported numbers.

Historical period selection

FY2017 to FY2026 financial history uses the selected later comparative filings inherited from project 03. This preserves segment recasts and statement presentation. Report year can therefore differ from the fiscal year of an input. The FY2017 PDF is retained as an archive original but has no selected source input in this DCF crosswalk.

Report pages used in the workbook

Report	PDF pages used	Input records
FY2017	Archive only	0
FY2018	53, 87	16
FY2019	51, 53, 54, 72, 76, 82, 83, 90	33
FY2020	55, 57, 58, 75, 77, 83, 84, 91	33
FY2021	57, 59, 60, 77, 80, 86, 87, 94	33
FY2022	57, 59, 60, 77, 80, 86, 87, 94	33
FY2023	58, 60, 61, 78, 80, 86, 87, 94	33
FY2024	56, 58, 59, 76, 79, 85, 92	34
FY2025	50, 52, 53, 62, 69, 72, 77, 78, 84	35
FY2026	1, 50, 52, 53, 62, 69, 71, 72, 77, 78, 84	94

Market and method evidence

Original quote responses, Treasury CSV and HTML, Damodaran ERP and rating HTML, calculator workbooks and HC3 method documentation are preserved in data/raw/market. Market_Source_Extracts.pdf is a readable review extract generated from those originals, clearly labelled as an extract.

The valuation selects the 8 October regular close and same-date Treasury yield. The explicitly dated 1 October ERP is used. The monthly ERP archive has an inconsistent last date serial and is retained as supporting evidence rather than used to set the valuation period.

Verification

The evidence manifest records file sizes and SHA-256 hashes. The annotation check verifies all native PDF text, page counts and original hashes remain unchanged. Original PDFs and raw HTML/JSON/CSV are separate from marked or generated review copies.
